

## PRESS RELEASE

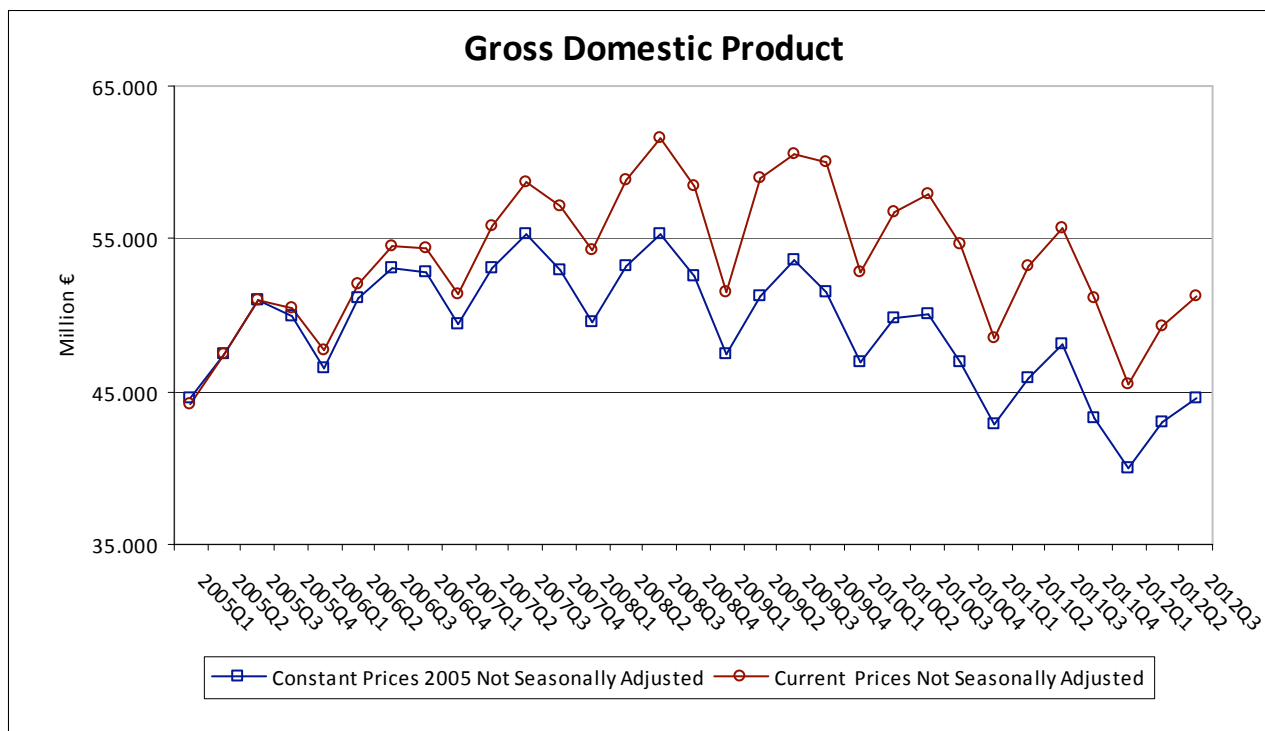

### QUARTERLY NATIONAL ACCOUNTS: 3<sup>rd</sup> Quarter 2012 (Flash estimates)

The Hellenic Statistical Authority (ELSTAT) announces the Gross Domestic Product for the 3<sup>rd</sup> quarter of 2012.

Available non-seasonally-adjusted data indicate that, in the 3<sup>rd</sup> quarter of 2012, the Gross Domestic Product (GDP) at constant prices of year 2005 decreased by 7.2% in comparison with the 3<sup>rd</sup> quarter of 2011.

The quarterly GDP estimates for the period Q1 2005 – Q2 2012 have been revised due to the recent revision of annual national accounts for the years 2006-2011 (September 2012).

The flash estimates are based on the use of preliminary indicators and are subject to change for the production of the provisional estimates (7 December 2012), when additional data sources will have become available.

## Gross Domestic Product

(In mill. €)

	Not seasonally adjusted figures <sup>1</sup>			
	At constant prices 2005	%*	At current prices	%*
2005 I	44580		44206	
II	47464		47452	
III	51008		50948	
IV	49997		50443	
2006 I	46579	4.5	47708	7.9
II	51160	7.8	52057	9.7

<sup>1</sup>As already reported before, due to the break in the time series of quarterly General Government data, and the resulting availability of data for only a very short period (2009Q1-2012Q3) on which to apply the seasonal adjustment calculation, combined with major changes reflected in the economic indicators used in the estimations of quarterly GDP, the implementation of seasonal adjustment does not provide satisfactory results. For this reason, the figures published are solely the non-seasonally-adjusted ones.
