License your work ... 
... because it is good for you!

What?
Any of your creative and scientific output. Not just your research results, but your research data, too!

Why?
National and European funding bodies require Open Access. Telling people how to use your work will encourage them to use it. Share your work openly, but gain recognition for it.

How?
Use Creative Commons: https://creativecommons.org/choose/
Answer just two questions and get a legally valid license for your work!
Do you allow people to re-use your work?
Do you allow commercial use of your work?

Which?
As open and reusable as possible!

DARIAH-EU recommends 
If you research data is not a work, you can label it to tell people that there are no intellectual rights attached.
