The Partners

NETcher is the network and social platform for cultural heritage, enhancing and rebuilding.
The NETCHER project (NETwork and social platform for Cultural Heritage Enhancing and Rebuilding) aims to build an information network and produce a charter of good practices on a European scale, by gathering a maximum numbers of actors engaged in cultural preservation.

It is funded by the 8th Framework Program of the European Union for Research and Innovation (Horizon 2020) and over a period of 2 years will bring together a consortium of 7 European entities, each one responsible for a research theme and a professional network.

NETCHER seeks to address the complex challenge of harmonizing and bringing together worthy, but often disconnected initiatives by using a participative approach that will result in the establishment of a structured network (defined as a Social Platform), drawing together a broad range of players such as international bodies, umbrella organizations, national governments, researchers, public policy makers and NGOs, as well as public and private foundations.

Following on the European Year of Cultural Heritage, NETCHER H2020 aims to provide for the European Commission a charter of good practices and policy recommendations regarding the fight against illicit trafficking of cultural goods. NETCHER will achieve two main tangible goals answering the European Commission’s needs: a charter of good practices and a social platform.
