## *The Great Smog of China*

edited by Jacqueline Nivard

After years of increasing public demand, the Chinese government is to release pollution data in 74 cities. Malcolm Moore at Telegraph reports: [...T]he Chinese state media said on **Sunday** that 496 monitoring stations would release data in real time on six types of pollutants, including sulphur dioxide, carbon monoxide and on PM2.5, particles that are so small they can only be detected by an electron microscope, but which can cause respiratory and heart disease. [...].
