2013-40 (October)

China's new energy vehicles

edited by Jacqueline Nivard

The overarching theme is the importance of innovations that are created within the emerging economies. More specifically, the article looks at the development of various alternatives to vehicles powered by the internal combustion engine, new energy vehicles (NEVs) within China.

Global garbage: excess, waste, and abandonment in the contemporary city

edited by Jacqueline Nivard

This interdisciplinary conference will bring together scholars from across the humanities and social sciences to explore the many ways in which garbage in its diverse forms and articulations is being produced, managed, experienced, imagined, circulated, concealed, and aestheticized in contemporary urban environments and across different creative and cultural practices.
