

Workshop
Cultures of Computation and Quantification
January – March 2013

Abstract

Quantifying with bricks, volume units, capacity units and weight units in Mesopotamia
Cécile Michel and Robert Middeke-Conlin

The session concerns quantifying using weight, capacity and volume units in educational and professional environments, as well as official standards. It will start with presentation of standards and lexical traditions concerning quantities in a more general sense and then will focus on brick quantifications and use.
